**How to rank To Dominate GOOGLE Using The Power
Of Youtube!**

Youtube SEO Cash!

Hello and welcome to a very special cash cow report. In this report I am going to show you a very clever strategy of ranking your videos on the first page of Youtube and then getting those videos indexed on Google.

The great thing about this method is that the more content you put out there the more traffic you will get from Google.

Video marketing is huge right now and the great thing about Youtube is that your videos can get indexed on Google if you know what to do and the type of content you put out there.

The beauty of this method is that you can use this for CPA or Clickbank offers or if you are just looking to build a list.

In this report I am going to show exactly what I am doing to dominate Google by using the power of Youtube videos.

So let me dive straight into this report shall I?

Getting Started

The first thing I want to show you in this report is a bit of proof on how well Youtube videos are ranked on Google if you use my strategy.

Here are some of the videos that have been ranked on Google for some of my main keywords.

Here is another one of my videos which gets me traffic to my CPA offer. This video is on page 2 of Google and yet it is still indexed.

This video has just over 100 views at the moment.

If I had lots of views to this video and lots of likes then most likely my video would end up appearing on the first page.

So what is the secret in getting your videos on the first page of Google?

How do you optimise them for SEO?

The first thing you need to do is make sure your Youtube video has the right amount of:-

- Views
- Correct keyword rich title
- Write tags
- Right amount of likes

Youtube ranking is not that difficult as opposed to getting ranked with Google or any other search engine.

The Youtube search engine results are easy to rank as opposed to ranking your video in Google.

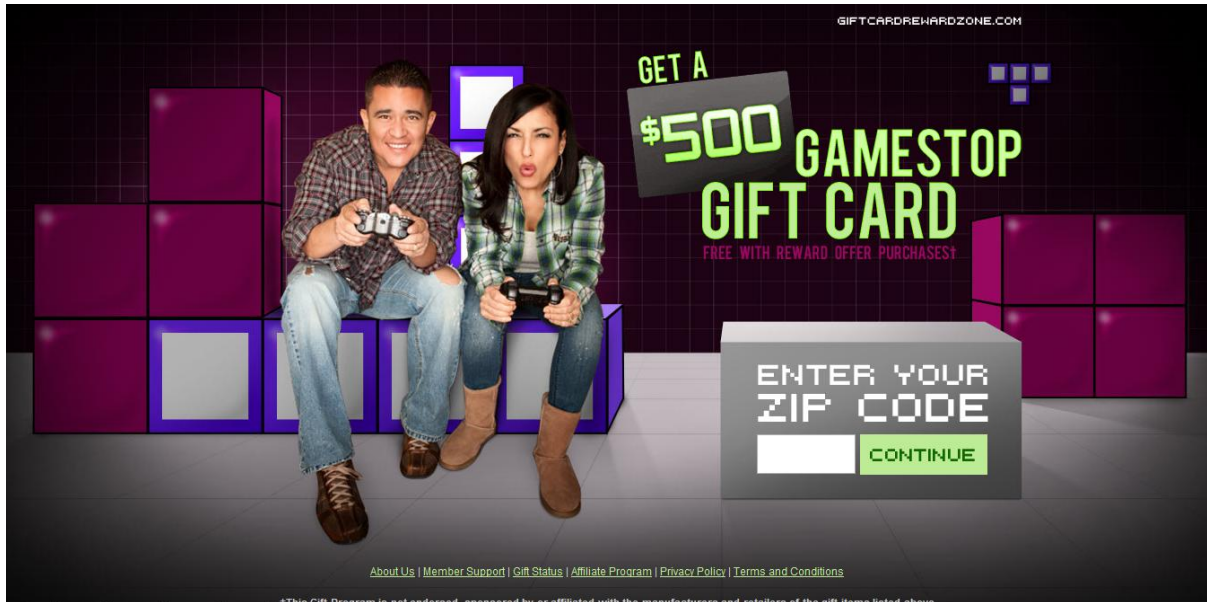

The first thing we are going to do is head over to one of your CPA networks and find an offer you can promote with this strategy.

I find that Youtube works well with “FREE” type of CPA offers.

You can create several of these videos and leave them on complete Autopilot and you will be getting unlimited traffic to your videos everyday.

For example, take a look at this CPA offer below.

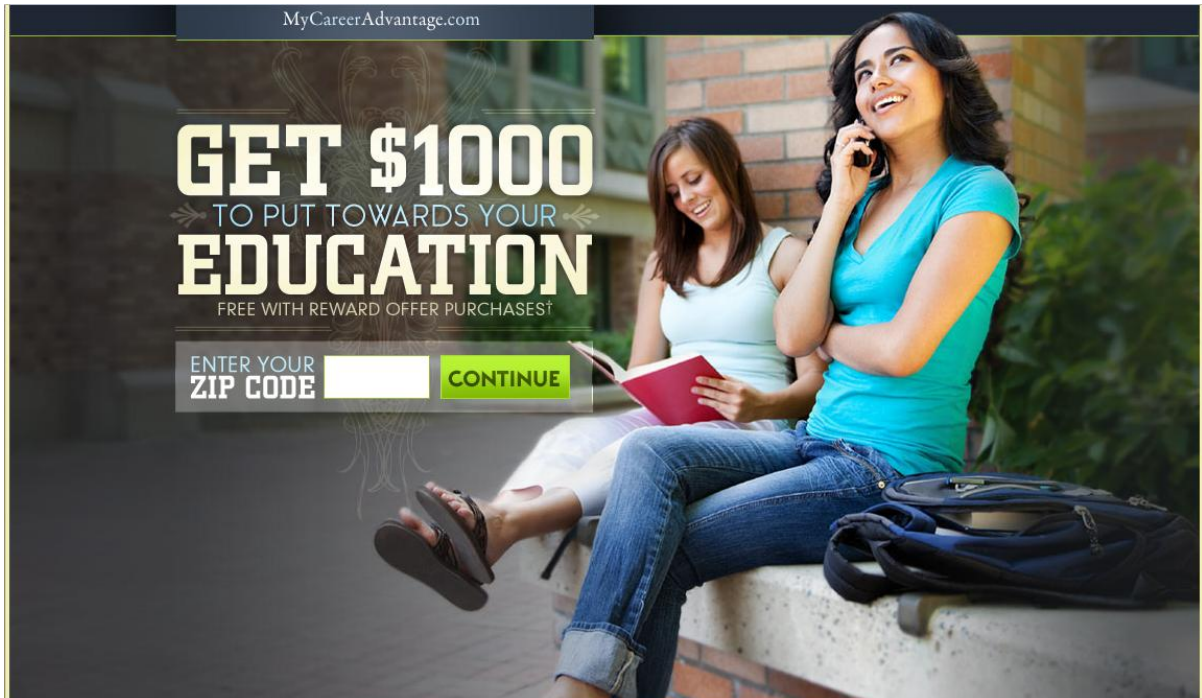

Youtube SEO Cash!

If someone enters their zip code then you get paid just over \$1.50 per lead.

These type of CPA offers convert like crazy and I am going to show you how to do that.

This CPA offer is aimed at gamers and there are a lot of people out there who love playing video games.

Here is a CPA offer that pays just over \$1.40 for a simply zip code submit.

How many students are there out there that would love to get a chance to win a \$1000 grant towards their education?

The key to promoting these type of CPA offers is to create simple short, videos and make sure they have a good keyword rich title.

For example, take a look at one of my old videos.

This video is still indexed by Google.

If we type in “Free Rihanna Ringtones” on Google you will see my video indexed on the first page – this video is getting unlimited traffic to my CPA offers without me doing anything!

This is Limited!

This video has just over 9,887 views as of now and it is high on the search engine results.

The video is 3 years old and gets me traffic to ANY of my CPA offers on autopilot.

You should also notice that I have used the colour red halfway through the video. I have done this for a reason.

Youtube SEO Cash!

This video also appears on Google for the keyword “Rihanna Ringtone”. This phrase gets a ton of searches every single day on Google for people who are looking to download Ringtones of Rihanna on their phones.

The reason I have used red is because it stands out and people are most likely to click.

For example, take a look at all of the videos below and notice the ones that stand out.

As you can see the “yellow” Dog Tease video stands out because of the bright colours.

So how do you go about dominating the Google search results with this strategy?

The first thing you need to do is create your Youtube video.

Youtube SEO Cash!

I usually use [Windows Movie Maker](#) and make my video short and sweet.

I always make sure halfway through the video I have an image of something “eye catching” or something that would catch the attention. Youtube will take the thumbnail of your video halfway. So for example, if your video is 10 minutes long then 5 minutes into the video you might want to use an image that stands out; which in turn will give your video lots of traffic.

Before you create your Youtube short video it is always good to see what people are searching for on Youtube.

So the next thing to do is head over to https://ads.youtube.com/keyword_tool and type in a keyword.

The keyword I am going to target is “download free” because people love downloading or watching things on Youtube.

Youtube SEO Cash!

As you can see there are many different keywords that are being searched when it comes to “download free”.

I am going to focus on the keyword “minecraft free download” since this gets just over 21,200 searches a month.

Minecraft is an indie building video game that allows people to build objects by placing blocks. It has a huge audience!

The first thing I am going to do is head over to Youtube and see whether videos are getting traffic on this keyword.

We can see that the videos that were uploaded this week have already started to generate traffic.

The next thing I am going to do is head over to my friend [Google Keyword Tool](#) and see how many searches there are for the keyword "minecraft free download".

As you can see there are an incredible 22,200 exact monthly searches for this keyword and there are overall, 110,000 searches for this.

Now I am going to see if there is a good keyword rich domain name available for this.

So I head over to InstantDomainSearch.com and see what is available.

This is a free service that instantly checks .com, .net, and .org domain name availability.

As you can see ALL 3 extensions of the domain name for the keyword are available 😊

The next thing I am going to do is snap up the .com domain name and then set up a simple Wordpress website to incorporate our Youtube video.

If you are going to use a simple wordpress theme then I tend to use this one.

<http://www.timewaster.de/wordpress-yast-theme/>

Once you have set up your Wordpress website the next thing to do is create your Youtube video.

When it comes to creating your video you can either hire someone from Fiverr.com or you can use Windows Movie Maker and create a simple, short free video and link it to an Affiliate offer.

Here is my completed Youtube video as you can see.

Now at this stage what you want to do is find an appropriate CPA offer for this or a relevant Clickbank offer.

For those people who are members of CPA Lead and Blam Ads you can easily use their widgets and get people to unlock your webpage to access the “content” of the website.

However, for the purposes of this report I am going to stick to an appropriate offer.

Now at this stage we need lots of views to this video and lots of people to “like” this video.

The best site to get people to give you lots of views and likes for your Youtube video is Fiverr.com.

I have used several Fiverr Gigs that have delivered in terms of results.

The first thing you need to focus on when it comes to getting your video higher up in the search engines is to focus on the “likes”.

The more “likes” your videos has the higher it will be on the search results.

Youtube SEO Cash!

Here is a perfect Fiverr Gig with 100% feedback that provides this service.

<http://www.fiverr.com/users/toxide/gigs/get-160-likes-to-your-youtube-video?ref=glst-g-ttl>

The screenshot shows a Fiverr gig listing for a user named 'toxide'. The gig title is 'I will get 160 likes to your YouTube video for \$5'. The category is 'Video' and it usually delivers within 2 days. There is an 'Order Now' button and a 'Contact Seller' link. The listing has 120 thumbs up and 0 thumbs down, with a '100% Positive' rating. The description asks if the user's video is awesome but not getting views and offers to provide up to 800 likes per video. There are social sharing options for Facebook, Twitter, and Email. The gig was created 5 months ago, has 108 buyers, and 39 people like it. The main image shows a computer monitor displaying the YouTube logo and 'Broadcast Yourself 160 Likes'. Below the monitor are two smaller images of the same monitor.

This guy will get you 160 likes to your Youtube video in a short space of time.

The same guy is also offering another Gig which is excellent.

The gig has 148 thumbs up and 2 thumbs down, with a 99% positive rating. The description states that the seller can do this gig twice for each video and provides a link to their profile. A monitor graphic displays the YouTube logo and the tagline 'Broadcast Yourself'. Recent buyer feedback from 'moccabros' is also visible.

In this Fiverr Gig this guy is offering to get you 60 likes, 20 comments and 60 subscribers to your Youtube Video.

But that does not end there with Fiverr.

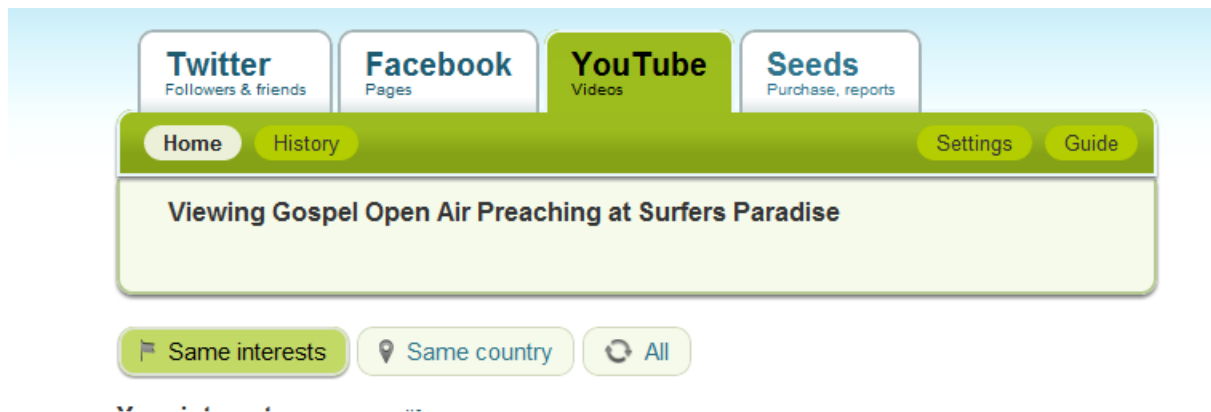

If you truly want to put your Youtube video on steroids then check out this Gig.

<http://www.fiverr.com/users/lamchops9/gigs/give-you-300-likes-and-300-favorites-on-your-youtube-video-plus-a-guide-on-how-to-gain-more-subscribers?ref=glst-g-ttl>

Youtube SEO Cash!

This guy is offering to get you 300 likes and 300 favourites on your Youtube video.

You can also use Twiends.com and focus on the Youtube section to get more views and likes for your video.

All you do is view other peoples videos to gain lots of seeds.

However, if you want thousands of seeds in a short space of time then you can cheat by heading over to this Fiverr Gig at <http://www.fiverr.com/users/jaydenanne/gigs/add-2000-seeds-to-your-twiends-account?ref=glst-g-ttl>

This will give you an advantage over everyone else 😊

There are also several other Fiverr gigs you can use to increase your Youtube views.

Check out the following Fiverr Gigs that offer to get you lots of views for your video.

<http://www.fiverr.com/users/djlobo/gigs/deliver-50000-views-to-your-youtube-videos?ref=glst-g-ttl>

Youtube SEO Cash!

<http://www.fiverr.com/users/cgjung/gigs/generate-around-40000-views-on-your-youtube-channel?ref=glst-g-ttl>

Once you have exhausted a few Fiverr Gigs the next thing to do is wait and see how far you end up on the Youtube search results and Google.

Most likely, if you have a keyword rich domain name then you definitely need to get your website indexed on Google.

The best way to do that is to use these two Fiverr Gigs 😊

http://www.fiverr.com/users/quo_vadiz/gigs/create-6000-profile-backlinks-with-xrumer

<http://www.fiverr.com/users/fvchamp/gigs/submit-your-site-or-blog-manually-to-20-social-bookmarking-sites-pr4-to-pr8>

These two gigs will get your sites indexed on Google and get you on the first page for your main keyword.

At this stage I would put this method on steroids.

By having your Youtube video and your website landing page the next thing you need to do is head over to Facebook and create a Fanpage on your video or the topic.

Simply head over to <http://www.facebook.com/pages/create.php>

The aim of the Fanpage would be to get people to view your Youtube video –i.e. you can directly send people to your Youtube video from Facebook as soon as they click on “like”.

Youtube SEO Cash!

This is possible by using the Iframe app -

<http://www.facebook.com/apps/application.php?id=190322544333196&ref=ts>

The screenshot shows a Facebook page interface. On the left is a navigation menu with options: 'Ctrl+P', a question mark icon, 'Get started', 'Wall', 'Info', and 'Welcome' (which is selected and has an 'Edit' link below it). Below the menu, it says '1 person likes this' and provides options to 'Add to my page's favourites', 'Unlike', and 'Share'. The main content area displays a video player titled 'Minecraft Free Download' with a sub-header 'Welcome'. The video player has a red background with the text 'Minecraft FREE Download' and a play button. A watermark 'Click the LINK Below to download' is visible over the video. The YouTube logo is in the bottom right corner of the video player, and the video progress bar shows '0:00 / 0:10'.

Simply paste the Youtube embed code into the APP field.
